DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to hybrid optical communication, which requires modulators and retroreflectors, classified in class 398, subclass 115.
 - II. Claim 16, drawn to photocell circuit, which has details of tuning the antenna through capacitance of the photodiode, classified in class 250, subclass 215.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the special technical features of Group I (modulators and retroreflectors) are patentably distinct from Group II (details of tuning the antenna through capacitance of the photodiode).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2633

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Although applicant has one month time period for reply and does not have to correct them, however, in order to compact prosecution the following objections were noted in the specification and the claims:

The specification is not separated by title such as "Background of the Invention", "Summary of the Invention", "Brief Description of the Drawings", etc.

Claims 5-15 are improper multiple dependent claims. See MPEP § 608.01(n).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalzid Singh whose telephone number is (571) 272-3029. The examiner can normally be reached on Mon-Fri 9am - 5pm.
